

LedgerCraft: complete build report

What this is: everything decided, built, referenced and left pending in LedgerCraft, from the first request to the current build, so it can be checked line by line.

Build: branch LedgerCraft, commit 1640ac2, report generated 06 October 2026. Repository: github.com/Vks-Nagpur/improvement-wing (folder ledgercraft/).

How to read the status tags: **[BUILT]** in the program and covered by automatic tests; **[PARTLY]** built with a stated limitation; **[UNVERIFIED]** built, but the legal text it relies on has not been read from the official source; **[NOT BUILT]** not in the program; **[CONSIDERED]** studied and deliberately not used.

Honesty note: nothing in this program has yet been run on real client books. All testing used generated practice books with known answers. Official government and ICAI websites could not be opened from the build environment, so several legal references rest on search results and secondary websites; each such item is marked **[UNVERIFIED]** below and in the app itself.

Contents

1. Your brief, in your words
2. Every request and what was done
3. Status at a glance
4. Principles: the accounting truth model
5. Legal and professional basis (formats, sections, guidance notes, rates)

- 17.Installation and distribution
- 18.Sources consulted
- 19.Verification register (facts and their status)
- 20.Pending, unverified and known limitations
- 21.Change log (every commit)
- 22.Appendix A: Truth model (full text)
- 23.Appendix B: Your messages (verbatim)

1. Your brief, in your words

Taken from your first messages (quoted, spelling as typed):

I want to build a software that can literally help Entities prepare Financial statements in Format Prescribed by ICAI AND LAW as per Guidance note which updates itself from time to time.. Give simple explanation of why this is required. Right from Import Tally Data with a single click button, import from zoho books, Import from busy, Import excel trial balance in particular format. Shift Current Year to right side (to make Next year financials so current year becomes previous year). Shows error. Ledger making most simple and fast possible... Search for Black horse excellence ... I want a make a product free for all. Self responsible.. compatible of managing Financials Depreciation calculation inventory and All step by step. Toggle switches etc.. Even to that extent that Print options... What to display when to. Notes to Accounts. Design Format of Boxes ... Companies, individual, huf, aop, boi, Partnership firm, LLP. Dep as per income tax master selector... fixed asset register. All shall be such simple ... done in under 3-4 mins after all imports.

Later additions that shaped the build: intent is to solve the problem, not to sell; study CompuTax/CompuBal; toughest coding that prevents data errors; self-correction and troubleshooting; data saving and audit trail; map once, not every time; UDIN is a paste-only space (no integration); signing-ready output in one folder (PDF/Excel); Windows desktop; no licence; product name LedgerCraft; check very large books (thousands of vouchers); cash-transaction compliance (old ss.269SS, 269ST, 269T, 40A(3)) in a separate sheet for the auditor; work offline without AI, with optional free local AI (Ollama); opening balance differences, loans taken/repaid counting principal only, wrong grouping (loan under creditors); proper design structure for tables and boxes; manual adjustments; first screen asks intent; professional look like CompuTax with client search; new Income-tax Act 2025 and new forms; last-year comparison for decisions.

2. Every request and what was done

#	Your request (short)	What was done	Where
1	Best GitHub repositories for non-developers; ideas for Finance + tech	Researched and answered (lists of useful open-source apps; concept ideas). No code.	Research only
2	Build software for ICAI/law-format financial statements; imports; roll forward; errors; all entity types; FAR; toggles; print; notes; free	Wrote the product blueprint (docs/financial-statements-tool/BUEPRINT.md): why it is needed, benchmark (Black Horse Excellence, CompuBal/CompuTax), entity frameworks, import design, error engine, mapping, FAR, notes, toggles, export, roll forward, versioned law packs, roadmap.	BUEPRINT.md
3	Intent is not to sell; study CompuTax/CompuBal; toughest error prevention;	Blueprint sections 9A to 9G added: data integrity, saving and audit trail, self-correction, map once,	BUEPRINT.md

#	Your request (short)	What was done	Where
	self-correction; audit trail; UDIN source; legal yet simple language	UDIN, export, compliance matrix.	
4	UDIN paste only; statements straight to a folder (PDF/Excel); how will users get it	UDIN is a paste-only field printed as entered. One-click export to a dated folder. Distribution via GitHub download (Windows).	Export, Sign and export screen
5	Windows desktop, no licence, name LedgerCraft	Named LedgerCraft; no licence file (all rights reserved, free to use); Windows build.	README Licence
6	Train on huge data; cash compliance checks (269SS/ST/T); auditor sheet; offline without AI; optional local AI	Engine v0.1: exact paise arithmetic, 32 checks at the time, practice-book generator with planted mistakes, ~1 million vouchers checked in about 5 seconds, auditor workbook, Ollama assistant.	lc-core, lc-testdata, lc-ai
7	Opening balance differences, loans principal only, loan grouped under creditors; find glitches yourself	Planted ~30 glitches in practice books; each must be found exactly; clean books must raise nothing. Loan register separates principal from interest and TDS.	Checks; tests
8	Proper design structure for final output (tables, boxes); install Ollama	Report model with exact rounding in any unit, Typst PDF (Boxed and Ruled layouts), Excel and HTML renderers, FAR with Schedule II and IT depreciation, cash flow (AS 3), ratios, ageing, LLP pack. Ollama installed and connected.	lc-core/report, lc-io/render
9	Summary for a non-technical person; what more can you do; connectors; better than Black Horse? studied YouTube?	Plain summary given. Connectors listed (Tally XML server, Zoho Books API, BUSY files, GST/26AS downloads). Black Horse video studied via its page and indexed material (site partly blocked).	Chat
10	Buttons and features in proper place and size; optional buttons (hide cash flow, delete ...)	Actions grouped top right of every screen; switches to hide statements/notes; delete client year to a Recycle Bin; remove an imported file.	UI
11	Manual adjustments are	Adjustments: journal entries over imported books, new ledgers, edit, switch off, delete, all audited;	Adjustments screen

#	Your request (short)	What was done	Where
	important	listed in auditor workbook.	
12	accountingtool.in: improve wherever we lag; fix lag; first screen asks intent	Start screen with three intents and per-intent steps; each request on its own thread (no freeze); buttons verified by a browser test.	Start screen; server
13	Look like CompuTax: client search, bars; Form 3CD replaced under new Act 2025	Top bar with client search (Ctrl+K), status bar; tax references switch by year: Income-tax Act 1961 and Form 3CD up to FY 2025-26; Income-tax Act 2025 and Form 26 from Tax Year 2026-27.	UI; rules pack
14	Share images	Screenshots sent.	Chat
15	Install design and fonts skills; alignment everywhere	Design pass: IBM Plex Sans and Plex Devanagari bundled, spacing scale, aligned tables and buttons.	UI
16	Rename branch	Default branch renamed by you to LedgerCraft; all work pushed there.	Git
17	Where are we lagging?	Gap list given: disclosures, roll forward, branches, periods, Word, graphs, tax audit workbook, GST 2B / 26AS, bank reconciliation, installer, Hindi/Marathi guide, practice books, small screens.	Chat
18	Do all of it; testing at the end	All gap items built (see sections 5 to 17).	Many
19	External review pasted (compiler not AI; confidence mapping; three disclosure states; draft vs final; rule provenance; pinned packs; tamper-evident)	All adopted. TRUTH-MODEL.md written; mapping status Rule/Suggested/Review/Confirmed; disclosures Known/Nil/Unknown; final copy blocked on open items; every rule carries source and verification; packs pinned per client year; audit trail called tamper-evident.	TRUTH-MODEL.md
20	Share screenshots	14 screenshots sent.	Chat
21	How to install	Built the Windows installer here and sent it; steps given.	Installer
22	Bento dashboard animation;	Dashboard in a bento grid with entrance motion;	Dashboard

#	Your request (short)	What was done	Where
	remove unnecessary; clean	detail tables folded; help boxes fold after first visit; extra home note removed.	
23	Comparison from last year, important for decisions	Every dashboard figure shows last year and the change; 'Points to look at'; 'Biggest movements'; note-by-note comparison; last-year column in Map ledgers.	Dashboard; Map ledgers
24	This report	This document, generated from the source code.	docs/report

3. Status at a glance

Area	Status	Note
Import: Tally one click (XML server, port 9000)	[BUILT]	Tested against a mock Tally server, not a real TallyPrime.
Import: Zoho Books (API and Excel export)	[PARTLY]	Excel export tested; API code written against Zoho's documented endpoints but not run against a live Zoho account.
Import: BUSY (Excel + List of Accounts)	[BUILT]	Tested on files written in BUSY's documented layout, not on a real BUSY export.
Import: Excel/CSV trial balance, day book, FAR (incl. hand-made sheets)	[BUILT]	
Checks (40 rules)	[BUILT]	Legal references of several are unverified (section 6).
Mapping with confidence status, memory per client	[BUILT]	
Formats: Company Div I, LLP, Non-corporate (Firm, Proprietor, HUF, AOP, BOI)	[UNVERIFIED]	Line items not yet compared word-by-word with the official Schedule III / ICAI texts; packs marked draft.

Area	Status	Note
Notes, ageing, MSME split, partner capital, PPE schedule, cash flow (AS 3), 11 ratios	[BUILT]	
Depreciation: Schedule II (book) and IT block rates, 180-day rule	[UNVERIFIED]	Rates from secondary sources; new-Act section number conflicting (33 vs 34).
Manual adjustments	[BUILT]	
Disclosures: three states, final copy blocked when unknown	[BUILT]	
Draft vs final copy	[BUILT]	
Roll forward to next year	[BUILT]	
Branch consolidation	[BUILT]	
Monthly / quarterly / custom periods	[BUILT]	
Outputs: PDF, Excel, Word, HTML preview, auditor workbook, manifest	[BUILT]	Word opens in LibreOffice; not yet opened in Microsoft Word by us.
Tax audit helper (Form 3CD to FY 2025-26; Form 26 from TY 2026-27)	[PARTLY]	Form 26 clause numbers not mapped (official form not read).
Bank reconciliation	[BUILT]	Tested on generated statements; real bank formats vary.
GSTR-2B and 26AS reconciliation	[PARTLY]	Built to the published file layouts; not yet tried on real downloads.
Dashboard (bento), last-year comparison, charts	[BUILT]	
Audit trail (hash-chained, tamper-evident)	[BUILT]	
Local AI (Ollama), explain/suggest only	[BUILT]	Optional.
Help in English, Hindi, Marathi; tour;	[BUILT]	Hindi/Marathi wording written by us; a native-

Area	Status	Note
guides		speaker review is advisable.
Windows installer	[PARTLY]	Built and packaged; not yet installed on a real Windows PC by us; not code-signed.
Ind AS (Div II/III), XBRL, ITR schedules, deferred tax computation	[NOT BUILT]	

4. Principles: the accounting truth model

- LedgerCraft is a **financial-statement compiler**, not an AI accounting program: books go in, deterministic and traceable statements come out.
- Money is held as whole paise (integers). Debit is positive, credit negative. No floating-point rounding errors in totals.
- The imported books are never changed. Your adjustments sit on top and can be switched off.
- Mapping states: **Rule** (only one place possible), **Suggested** (LedgerCraft's proposal, needs your confirmation), **Review** (your earlier choice but the books changed), **Confirmed**, **Unmapped**. Memory is kept per client with context (group and Dr/Cr side), not just the name.
- Disclosures have three states: **given**, **explicitly Nil**, **unknown**. Unknown never becomes Nil; the draft prints 'information not provided'.
- A **draft** can always be printed (it says how many problems are open). A **final signing copy** is refused while any blocker is open (section 4 of Appendix A).
- Rules and formats are data with provenance (authority, document, section, effective dates, verification) and are pinned per client year; a newer pack is adopted only when you choose to migrate.
- The audit trail is hash-chained: editing or deleting an entry in the middle is detected. It is tamper-evident, not tamper-proof.
- AI is outside the trust boundary: it explains and suggests, never changes a figure, and every answer is labelled and logged.

Full text in Appendix A.

5. Legal and professional basis

5.1 Which format applies to which entity

Entity	Format followed	Status
Company (not Ind AS)	Companies Act, 2013, Schedule III, Division I (as amended by MCA notification of 24-03-2021) and ICAI Guidance Note on Division I (Non Ind AS) Schedule III (revised January 2022)	[UNVERIFIED] line items to be compared with the official text

Entity	Format followed	Status
LLP	ICAI Guidance Note on Financial Statements of Limited Liability Partnerships	[UNVERIFIED]
Partnership firm, Proprietor, HUF, AOP, BOI	ICAI Guidance Note on Financial Statements of Non-Corporate Entities (issued August 2023). Applicability reported as phased: Phase I from periods beginning 1-4-2025 (turnover above ₹5 crore), Phase II from 1-4-2026 (all covered entities), per ICAI ASB announcement of 31-03-2026 as reported by secondary sources	[UNVERIFIED] official ICAI page could not be opened
Company (Ind AS), NBFC	Schedule III Divisions II and III	[NOT BUILT]

5.2 Line items of each format (exactly as in the build)

Codes: H = heading, S = sub-heading, I = line item (shown with a note number), SUM = computed total.
'keep' = printed even when nil.

Schedule III, Division I (Companies not following Ind AS) (company_div1, status: draft – line items to be verified against Schedule III (as amended 24-03-2021) and ICAI Guidance Note on Division I)

Titles: 'Balance Sheet as at {end}' and 'Statement of Profit and Loss for the year ended {end}'. Profit of the year goes to: RESERVES_SURPLUS ('Surplus / (deficit) in Statement of Profit and Loss for the year').

5.3 Income-tax: which Act and which form, by year

Year of the client	Act used for references	Tax audit form	Status
FY 2025-26 and earlier	Income-tax Act, 1961	Form 3CA / 3CB with Form 3CD	[BUILT]
Tax Year 2026-27 onwards (from 2026-04-01)	Income-tax Act, 2025	Form 26 (section 63; Rule 47, Income-tax Rules 2026, G.S.R. 198(E) of 20-03-2026 as reported)	[UNVERIFIED] clause numbers of Form 26 not mapped

5.4 Old and new section numbers used

Item	Income-tax Act, 1961	Income-tax Act, 2025 (as used)	Status
Cash payment of expenses above ₹10,000 (₹35,000 transporters)	s.40A(3)	s.36	[UNVERIFIED] per published section listings; sub-section not read
Asset bought in cash (cost not allowed for depreciation)	s.43(1), 6th proviso	not confirmed (shown as 'actual-cost rule')	[UNVERIFIED]
Cash receipt of ₹2 lakh or more	s.269ST	s.186	[UNVERIFIED]
Loan/deposit accepted in cash or by journal (₹20,000 or more)	s.269SS	s.185	[UNVERIFIED]
Loan/deposit repaid in cash	s.269T	s.188	[UNVERIFIED]
Depreciation	s.32	s.33 (rules pack) — secondary sources also cite	[UNVERIFIED]

Item	Income-tax Act, 1961	Income-tax Act, 2025 (as used)	Status
		s.34: conflicting	
Tax audit	s.44AB	s.63	[UNVERIFIED]

In the app every unverified reference is printed with '[reference not yet verified against the official text]'.

5.5 Thresholds (data in rules pack)

Threshold	Value
cash_expense_payment_paise	₹10,000
cash_payment_transporter_paise	₹35,000
cash_receipt_paise	₹200,000
cash_loan_paise	₹20,000
capital_item_in_expense_paise	₹25,000

5.6 Other legal and professional points built in

Point	Reference	How it is built	Status
Audit trail (edit log) in accounting software	Companies (Accounts) Rules, 2014, rule 3(1) proviso, from FY 2023-24	Hash-chained log of every import, mapping, setting, adjustment, export and AI answer; cannot be switched off	[BUILT]
UDIN	ICAI UDIN guidelines	Paste-only field, printed as entered; no integration (no public generation API found)	[BUILT]
Rounding off	Schedule III general instructions (units by turnover)	Choice of ₹, thousands, lakhs, millions, crores; totals always cast exactly after rounding (largest remainder)	[BUILT]
Ageing of trade	Schedule III (2021 amendment): less	Ageing note and dashboard	[BUILT]

Point	Reference	How it is built	Status
receivables and payables	than 6 months, 6 months-1 year, 1-2, 2-3, more than 3 years; disputed / undisputed; MSME split for payables	charts	]
Ratios with reasons for change over 25%	Schedule III (2021 amendment), 11 ratios	Computed both years; changes over 25% flagged 'explain'	[BUILT]
MSME disclosure	MSMED Act, 2006 s.22 interest disclosures	Six interest figures entered by you; principal from creditors tagged msme	[BUILT]
Share capital, >5% holders, promoter shareholding	Schedule III Division I	Disclosures screen; total must agree with books or final copy is refused	[BUILT]
Cash flow statement	AS 3 (indirect method)	Prepared; can be switched off	[BUILT]
Accounting policies wording	AS 1 / framework per entity	Standard text per entity type, editable; a warning always reminds you to review it	[BUILT]

6. Checks the program runs (all rules, with references)

Rules pack in-rules, version 2026.10-draft. Pack-level verification note: Legal references unverified against official texts (see TRUTH-MODEL.md §10).

Thresholds and legal references are data. New-Act numbers 185/186/188 and 33 per incometaxindia.gov.in section pages and TaxTMI; s.36 as the counterpart of s.40A(3) per published section listings (statute text not yet read); the counterpart of s.43(1) 6th proviso is not yet confirmed. Tax audit: Form 26 under s.63 / Rule 47 (Income-tax Rules 2026, G.S.R. 198(E), 20-03-2026) from Tax Year 2026-27; Form 3CA/3CB/3CD for FY 2025-26 and earlier.

OPENING_TOTAL_DIFF	Must fix	Difference in opening balances	Opening debits and credits of this year are not equal.		LedgerCraft accounting logic · Double-entry arithmetic and data integrity	internal
OPENING_DIFF	Check	Opening balance differs from last year's closing	This ledger's opening this year does not match its closing last year.	AS 5 / consistency of comparatives / AS 5 / consistency of comparatives	LedgerCraft accounting logic · Double-entry arithmetic and data integrity	internal
OPENING_MISSING_LEDGER	Check	Last year's ledger missing this year	A ledger had a closing balance last year but is not in this year's books.		LedgerCraft accounting logic · Double-entry arithmetic and data integrity	internal
OPENING_NEW_LEDGER	Check	New ledger with opening balance	A ledger has an opening balance but did not exist last year.		LedgerCraft accounting logic · Double-entry arithmetic and data integrity	internal
PL_OPENING	Check	Income/expense ledger has an opening balance	Income and expense ledgers must start the year at zero.		Companies Act, 2013 Schedule III; ICAI Guidance Notes; Accounting Standards · Presentation and classification	[UNVERIFIED]
UNKNOWN_GROUP	Must fix	Group not recognised	This ledger's group could not be linked to a standard group. Tell LedgerCraft		LedgerCraft accounting logic · Double-entry arithmetic and	internal

Code	Level	Title	Plain meaning	Section (old / new)	Source	Verification
			the parent group once.		data integrity	
MAPPING_UNCONFIRMED	Must fix	Placement needs your confirmation	LedgerCraft has placed these ledgers, but they could go under more than one line (or were placed by name or moved because of their balance). Confirm each one on the Map ledgers screen; it is remembered for this client.		LedgerCraft accounting logic · Double-entry arithmetic and data integrity	internal
MAPPING_REVIEW	Must fix	Earlier placement needs review	You placed these ledgers earlier, but their group in the books or their Dr/Cr side has changed since. Check and confirm them again on the Map ledgers screen.		LedgerCraft accounting logic · Double-entry arithmetic and data integrity	internal
UNMAPPED	Must fix	Ledger not mapped	This ledger has no place in the financial statements yet.		LedgerCraft accounting logic · Double-entry arithmetic and data integrity	internal
VOUCHER_UNBALANCED	Must fix	Voucher debit and credit	This voucher's debits and credits are not		LedgerCraft accounting logic · Double-entry	internal

Code	Level	Title	Plain meaning	Section (old / new)	Source	Verification
		differ	equal.		arithmetic and data integrity	
VOUCHER_UNKNOWN_LEDGER	Must fix	Voucher uses a ledger not in the trial balance	A voucher refers to a ledger that is missing from the trial balance.		LedgerCraft accounting logic · Double-entry arithmetic and data integrity	internal
VOUCHER_TB_MISMATCH	Must fix	Vouchers do not add up to trial balance	Opening + all vouchers does not equal the closing balance of this ledger.		LedgerCraft accounting logic · Double-entry arithmetic and data integrity	internal
VOUCHER_OUTSIDE_PERIOD	Check	Voucher dated outside the financial year	This voucher's date is outside the year being prepared.		LedgerCraft accounting logic · Double-entry arithmetic and data integrity	internal
DUPLICATE_VOUCHER	Check	Possible duplicate voucher	Two vouchers have the same date, ledgers and amounts.		LedgerCraft accounting logic · Double-entry arithmetic and data integrity	internal
NEGATIVE_CASH	Check	Cash balance negative	Cash in hand went below zero at the end of this day, which is not possible in reality.		LedgerCraft accounting logic · Double-entry arithmetic and data integrity	internal
CASH_CREDIT_BALANCE	Must fix	Cash in hand has credit balance	Cash in hand cannot be negative at year end.		LedgerCraft accounting logic · Double-entry arithmetic and data integrity	internal
SUSPENSE_BALANCE	Check	Suspense	Suspense must		LedgerCraft	internal

Code	Level	Title	Plain meaning	Section (old / new)	Source	Verification
		account has a balance	be cleared before finalising.		accounting logic · Double-entry arithmetic and data integrity	
BRANCH_NOT_ELIMINATED	Must fix	Branch accounts do not cancel out	In the combined books, the head office and branch accounts (group Branch / Divisions) should cancel to nil. They leave a difference: goods or cash in transit, or an entry passed in one set of books only.		LedgerCraft accounting logic · Consolidation of branch accounts	internal
BRANCH_GROUP_CONFLICT	Check	Same ledger, different groups in branches	This ledger is grouped differently in head office and a branch. LedgerCraft uses the head office group; correct the branch books if that is wrong.		LedgerCraft accounting logic · Consolidation of branch accounts	internal
ABNORMAL_BALANCE	Check	Unusual balance side	This ledger normally has the opposite balance.		Companies Act, 2013 Schedule III; ICAI Guidance Notes; Accounting Standards · Presentation and classification	[UNVERIFIED]

7. Depreciation

Pack status: Useful lives (Companies Act 2013, Schedule II) and block rates (Income-tax Rules, Appendix I; carried forward under Income-tax Act 2025 s.33 per secondary sources) – verify against official text before final use.. Residual value used for book depreciation: 5.0%.

7.1 Book depreciation: useful lives (Companies Act, 2013, Schedule II)

Key	Asset class	Useful life (years)
building_rcc	Buildings (other than factory buildings) – RCC frame structure	60
building_non_rcc	Buildings (other than factory buildings) – other than RCC frame	30
factory_building	Factory buildings	30

Key	Asset class	Useful life (years)
fences_wells	Fences, wells, tube wells	5
plant_general	Plant and machinery – general	15
furniture	Furniture and fittings – general	10
electrical	Electrical installations and equipment	10
office_equipment	Office equipment	5
computers_end_user	Computers – end user devices (desktops, laptops)	3
servers_networks	Computers – servers and networks	6
motor_car	Motor cars, buses, lorries (not used in hire business)	8
motorcycle	Motor cycles, scooters and mopeds	10
motor_hire	Motor buses, lorries, cars used in hire business	6

7.2 Income-tax depreciation: block rates

Key	Block of assets	Rate %
building_res	Buildings – residential (other than hotels and boarding houses)	5
building_other	Buildings – other than residential	10
building_temp	Buildings – purely temporary erections	40
furniture	Furniture and fittings	10
plant_general	Plant and machinery – general	15
motor_car	Motor cars (other than used in hire business)	15

Key	Block of assets	Rate %
motor_hire	Motor buses, lorries, taxis used in hire business	30
computers	Computers including computer software	40
books_annual	Books – annual publications / professional books	40
pollution_energy	Pollution control / energy saving devices	40
ships	Ships and vessels	20
intangibles	Intangible assets (know-how, patents, copyrights, trademarks, licences, franchises)	25

- Additions put to use for less than 180 days in the year get half the rate (income-tax).
- Sold assets reduce the block (sale proceeds); the written-down value is carried forward on roll forward.
- Short periods (month, quarter): book depreciation is pro-rated by days of the 12-month year; the income-tax annexure is omitted.
- The fixed asset register is checked against the books (net block and depreciation).

8. Ratios, ageing and analysis

Ratio	Numerator	Denominator	Unit
Current ratio	Current assets	Current liabilities	times
Debt-equity ratio	Total borrowings	Owners' funds / shareholders' equity	times
Debt service coverage ratio	Profit after tax + depreciation + finance costs	Finance costs + principal repaid	times
Return on equity	Profit after tax	Average owners' funds	%
Inventory turnover ratio	Cost of goods sold	Average inventory	times
Trade receivables turnover ratio	Revenue from operations	Average trade receivables	times

Ratio	Numerator	Denominator	Unit
Trade payables turnover ratio	Purchases	Average trade payables	times
Net capital turnover ratio	Revenue from operations	Working capital (current assets - current liabilities)	times
Net profit ratio	Profit after tax	Revenue from operations	%
Return on capital employed	Profit before interest and tax	Capital employed (owners' funds + borrowings)	%
Return on investment	Income from investments	Average investments	%

A ratio is flagged when it moves by more than 25% against last year.

8.1 Dashboard (what it shows and how it decides)

- Profit for the year with change on last year (₹ and %), margin, and revenue / other income / expenses and tax for both years.
- Final copy readiness: must-fix problems, placements to confirm, disclosures to answer, each with an Open button.
- Key figures (revenue, total assets, cash and bank, debtors, creditors, borrowings): this year, last year, change in ₹ and %, and two bars.
- **Points to look at** (facts only, no conclusions): profit up/down 25% or more; profit turning to loss; margin moving by 2 percentage points or more; revenue up/down 25% or more; debtors, stock, creditors or employee costs growing at least 15 points faster than revenue; borrowings, finance costs or cash moving 25% or more; ratios moving more than 25%. Small amounts (under 0.5% of the larger of revenue and total assets) are ignored.
- **Biggest movements**: the 8 note lines with the largest change in rupees (capital-account movement lines left out).
- Charts: sales and purchases by month, expense make-up this year and last year, ageing of debtors and creditors. Tax audit items with counts and amounts. Ratios for both years.
- Detailed tables (folded): key figures, every note line this year against last year, loans, ratios, ageing.

9. Tax audit helper, reconciliations and the auditor workbook

Helper workbook sheet (by clause)	Status
18 Depreciation	[BUILT]

Helper workbook sheet (by clause)	Status
21(d) Cash payments	[BUILT]
26 Statutory dues	[BUILT]
31 Loans	[BUILT]
31(ba) Cash receipts	[BUILT]
34 TDS check	[BUILT]
40 Ratios	[BUILT]
44 GST break-up	[BUILT]
Index	[BUILT]

File name: Tax_Audit_Helper_Form_3CD.xlsx (up to FY 2025-26) or Tax_Audit_Helper_Form_26.xlsx (from Tax Year 2026-27). For Form 26 the sheets keep the 3CD clause subjects; Form 26 clause numbers are not yet mapped.

- Bank reconciliation: statement lines matched with the day book on the same amount, date within 10 days, cheque number when both have one. Open items: cheques issued not presented, deposits not cleared, credits and debits by the bank only, difference.
- GSTR-2B: JSON (data.docdata b2b and cdnr) or portal Excel (B2B sheet, two header rows); ITC per supplier against books; invoices with ITC not available are left out.
- Form 26AS: TRACES text file (caret-separated) or Excel; TDS per deductor (TAN) against books.
- Parties matched by GSTIN/TAN or a similar name (noise words removed); 'name looks alike' cases shown for you to check.
- Auditor workbook sheets: Summary, Index, All findings, Loan register, Adjustments, one sheet per bank reconciliation, GST 2B recon, 26AS recon.

10. App flow and every screen

Route (what you chose on the start screen)	Steps shown on the left, in order
Financial statements	Clients and years → Import books → Check → Dashboard → Map ledgers → Bank reconciliation → GST and TDS (2B, 26AS) → Adjustments → Notes and

Route (what you chose on the start screen)	Steps shown on the left, in order
	disclosures → Presentation → Sign and export → Audit trail
Check and analyse	Clients and years → Import books → Check → Dashboard → Bank reconciliation → GST and TDS (2B, 26AS) → Map ledgers → Adjustments → Audit trail
Tax audit help	Clients and years → Import books → Check → Dashboard → Bank reconciliation → GST and TDS (2B, 26AS) → Adjustments → Sign and export → Audit trail

Always available: Start (home) to change the intent; client search (Ctrl+K); Alt+1...9 jumps to a step; Help menu (language English/Hindi/Marathi, help on/off, expert mode, tour, shortcuts); 'What to do now' box with a Go button; status bar (client, save state, Act and form in use, rules version, data folder, version).

10.1 Screens: title, purpose and every button

Start — What do you want to do today?

Choose one. LedgerCraft then shows only the steps you need, in order, on the left.

Buttons: How it works

Clients and years

Each client has one folder per financial year. Mapping you do once is reused every year.

Buttons: Open data folder; Recycle Bin; Create

Import books

Bring in the trial balance, and if you have them, last year's balances, the day book and the fixed asset register.

Buttons: Next; Find companies; Import; Add branch

Check

LedgerCraft checks the books the way an experienced CA would. Nothing is changed by itself.

Buttons: Run checks; All; Must fix; Check; Note; Show all findings

Map ledgers

LedgerCraft places most ledgers itself. Change any line once; it is remembered for this client every year.

Buttons: Confirm all suggested; Next

Bank reconciliation

Upload the bank statement (Excel or CSV, as downloaded from net banking) for each bank account. LedgerCraft matches it with the day book and prepares the reconciliation.

Buttons: Next

GST and TDS (2B, 26AS) — GST and TDS

Compare the books with GSTR-2B (input tax credit) and Form 26AS (tax deducted by customers), party by party.

Buttons: Next

Adjustments

Entries you pass on top of the books: provisions, rectifications, audit adjustments, closing stock. The imported books are never changed.

Buttons: New adjustment; Next; Add line; Cancel; Save adjustment

Notes and disclosures

Particulars that are not in the books: share capital, shareholders, contingent liabilities, related parties, MSME interest, your own accounting policy wording and extra notes.

Buttons: Preview; Save disclosures; Next; Share capital; Contingent liabilities; Related parties; MSME interest; Accounting policies; Other notes; Add class of shares; Add shareholder; Add promoter; Add line; Add party; Add transaction; Add policy; Add note

Dashboard

This year against last year, what still blocks a final copy, and items for tax audit. Figures include your adjustments.

Buttons: Run checks again; Save auditor workbook; Next

Presentation

Choose what to print and how it looks. The preview on the right updates when you save.

Buttons: Reset to standard; Refresh preview; Save and preview; Q1; Q2; Q3; Q4; April to September; Calendar year

Switches: Balance Sheet; Statement of Profit and Loss; Cash Flow Statement; Notes to accounts; Tax depreciation annexure; Cover and contents page; Charts annexure (analytical review); Entity information and accounting policies; Ratios (with reasons); Ageing of debtors and creditors; Fixed asset schedule; Each debtor and creditor by name; Previous year column; Hide lines that are nil; Re-letter (a), (b), (c) after hiding

Sign and export

Fill the signing details once; they are carried to next year. Export puts every file in one folder.

Buttons: Open export folder; Save and export; Add signatory

Switches: PDF (for printing); Excel of the statements; Word document (to edit wording); Auditor workbook (findings, loans, adjustments); Tax audit helper (Form 3CD / Form 26 clauses); Preview page (opens in a browser); Data file for other software

Audit trail

Every import, change, adjustment and export is recorded in a tamper-evident log on this PC. It cannot be switched off.

Buttons: Reload

Buttons created by the program at run time (inside lists and tables): Open, Start next year, Delete, Restore, Choose file / Replace, Remove, Confirm, Suggest, Reset, See list, Explain, Edit, Switch off / on, Open (dashboard readiness), Import last year.

- Light theme, deep green accent (OKLCH colour space; neutrals tinted slightly green). Red only for 'Must fix'; amber for 'Check'.
- Fonts: IBM Plex Sans (Latin) and IBM Plex Sans Devanagari, bundled (SIL Open Font Licence), so Hindi and Marathi render on any PC. PDF uses Liberation Serif / DejaVu Serif (bundled, free licences).
- Layout: top bar (logo, client search, Help, Local AI, Quit); left step bar; main area with title, short purpose line and the screen's buttons at top right; status bar at the bottom. Tables scroll inside their box on small screens with the Actions column pinned.
- Dashboard: bento grid (12 columns): Profit (large), Final-copy ring, key figure tiles, Points to look at, Biggest movements, monthly chart, tax audit list, expense make-up, ageing, ratios.
- Motion: tiles rise in turn (380 ms, 45 ms apart), figures count up (600 ms), bars grow, chart lines draw; plays once per set of results; off when Windows 'reduce motion' is on. Only transform/opacity are animated.
- Charts: categorical colours #2a78d6, #eb6834, #1baf7a, #eda100, #e87ba4, #008300 (checked with a colour-blind validator; direct labels added because two colours are low-contrast); ageing uses one blue from light (recent) to dark (oldest).
- PDF: A4, cover and contents, running headers, page x of y, two table styles (Boxed or Ruled), landscape schedules, DRAFT watermark and 'N problems unresolved' footer on drafts.
- Screen sizes checked: 1440, 1280 and 1024 pixels wide.

12. Imports: what files are read and how

Column kind	Header names recognised (any case)
LEDGER	ledger, ledger name, particulars, account, account name, name
GROUP	group, under, parent, group name, parent group
CLOSING_SIGNED	closing, closing balance, balance, closing balance (dr/cr)
CLOSING_DR	closing dr, closing debit, debit, dr, dr. amount, dr amount, net debit, debit amount
CLOSING_CR	closing cr, closing credit, credit, cr, cr. amount, cr amount, net credit, credit amount
TYPE_COL	account type, account group, type, category

- Tally: TallyPrime XML server (Help > Settings > Connectivity, port 9000). Fetches companies, trial balance with groups, last year's balances, and the day book month by month.
- Zoho Books: trial balance Excel export (account type column mapped to Tally-like groups) or API v3 with OAuth.
- BUSY: trial balance Excel with its 'List of Accounts' as the account master for groups.
- Excel/CSV: LedgerCraft template; hand-made sheets with title lines, text amounts with Indian commas, Debit/Credit columns, blank lines and Total rows are accepted. A file that cannot be read is refused with the reason.
- Day book (CSV/Excel), fixed asset register (Excel), bank statements (Excel/CSV), GSTR-2B (JSON/Excel), Form 26AS (text/Excel), branch trial balances and day books.

13. Exports: what files are produced

File	What it is
Financial_Statements.pdf	Signing-ready statements (cover, contents, Balance Sheet, P&L, Cash Flow, notes, schedules, annexures, optional charts)
Financial_Statements.xlsx	Same statements in Excel
Financial_Statements.docx	Same statements in Word (optional)
Financial_Statements_preview.html	Preview

File	What it is
Auditor_Reference_Workbook.xlsx	Findings, loan register, adjustments, reconciliations
Tax_Audit_Helper_Form_3CD.xlsx / _Form_26.xlsx	Clause-wise supporting data (optional)
analysis.json	All figures and findings, machine readable
export-manifest.json	SHA-256 fingerprint of every file

Folder: Documents\LedgerCraft Data\Exports\<client>\FY <year>\Draft-<date>_v<n> (or Final). A final copy is refused while blockers are open.

14. Technical architecture

Part	Role	Lines of code
lc-ai	Ollama client and guarded assistant	528
lc-app	Desktop app: local web server on 127.0.0.1 with a session token, storage, audit trail, screens	5807
lc-cli	Command line (analyse books and export, list Tally companies, write practice data, benchmark)	445
lc-core	Engine: money, groups, mapping, checks, figures, rounding, ratios, ageing, capital, FAR, adjustments, consolidation, reconciliations, report model, charts	9426
lc-io	Readers and renderers (PDF via Typst, Excel, Word, HTML), export, tax audit helper, portal files	5419
lc-testdata	Practice-book generator with expected answers	2265

- Language: Rust (one .exe, no installation of other software needed). Screens in plain HTML/CSS/JavaScript served by the program to your browser on this PC only.
- Storage: Documents\LedgerCraft Data, one folder per client and year: inputs, settings, mapping memory with context, pinned rule and format packs, audit log, exports, Recycle Bin.
- Each request runs on its own thread; changes are written one at a time so two clicks cannot corrupt a file.
- Considered and not used: Tauri desktop shell with auto-updater (needs code signing); a bundled AI model inside the program (too large).

15. Local AI

- Ollama on the same PC (ollama.com, free). Models offered: qwen2.5:3b (recommended; English, Hindi, Marathi; about 2 GB; 8 GB RAM PC), llama3.2:3b, qwen2.5:1.5b (older PCs).
- Uses: explain a finding in simple language; suggest a placement for a ledger (must be one of the allowed heads, otherwise rejected); draft a reason for a ratio change; answer questions about the engagement.
- Never changes a figure. Every answer is labelled as an AI suggestion with the model name and recorded in the audit trail. The program works fully without it.

16. Testing and verification

60 automatic tests (Rust), run before every push together with formatting and lint checks. Names:

sanitize_and_parse_tally_quirks, request_is_well_formed, every_scenario_survives_excel_and_csv, export_is_versioned_and_signing_copy_needs_no_blockers, tax_audit_helper_lists_the_planted_cases, messy_hand_made_trial_balance_is_read, one_click_tally_import_reproduces_books, clear_message_when_tally_is_not_running, zoho_trial_balance_export_with_sections_and_types, busy_trial_balance_with_account_master, zoho_api_client_refreshes_token_and_pages, gstr2b_json_with_items_credit_note_and_itc_not_available, gstr2b_excel_with_two_header_rows, form_26as_text_file_part_one, withdrawal_and_deposit_columns_with_account_details_above, amount_with_dr_cr_column, report_casts_in_every_unit, disclosures_print_and_check_against_books, clean_firm_has_no_findings, clean_company_has_no_findings, many_random_clean_books_have_no_false_alarms, every_planted_glitch_is_found, loan_register_counts_only_principal_as_accepted, excel_import_errors_are_found, findings_carry_legal_reference_by_year, placements_need_confirmation_and_reopen_when_the_books_change, clean_llp_and_huf_have_no_findings, branch_books_combine_and_cancel_out, full_flow_through_the_app, adjustments_hiding_removal_and_recycle_bin, branches_are_consolidated_and_must_cancel_out, bank_statement_is_matched_and_reconciled, protocol_and_guards, friendly_errors, live_local_ollama, creates_ledger_and_keeps_tb_balanced, rejects_unbalanced_unknown_and_blank, inactive_is_ignored_and_vouchers_added_only_with_day_book, keeps_total, signed_zero_sum, random_sets_always_hit_target, open_items_explain_the_difference, same_amount_prefers_cheque_number_then_nearest_date, rounding_and_format, formats, adds_ledgers_and_eliminate_branch_accounts, reports_differences_and_group_conflicts, resolves_user_groups, parse_variants, from_float, indian_format, income_tax_block_with_half_rate_and_sale, schedule_ii_slm_and_wdv, roll_forward_carries_depreciation_and_drops_sold_assets, a_quarter_takes_a_quarter_of_the_years_depreciation, names_match_without_noise_words, rows_for_matched_missing_and_extra, itc_and_tds_are_attributed_to_the_party_of_the_voucher, ids_roundtrip, name_rules

Practice book	What it tests	Planted problems	Expected profit (₹)
branch_books	Head office and Pune branch: combine them; the inter-branch accounts cancel out	0	1,44,64,417.58
clean_company_2	Clean company books, 12 vouchers/day, no planted errors	0	5,24,26,107.18
clean_firm_1	Clean partnership firm books, 4 vouchers/day, no planted errors	0	1,79,13,008.55
clean_huf	Clean HUF books, Karta's capital, no planted errors	0	95,77,371.28
clean_llp	Clean LLP books, partners' contribution, no planted errors	0	1,58,54,690.54
excel_import_errors	Unbalanced voucher, unknown ledger, unknown group, edited TB closing, voucher outside the year	6	90,90,562.43
firm_with_glitches	Partnership firm with planted opening differences, wrong groupings, cash-limit, loan (principal vs interest) and voucher errors	29	2,81,60,788.97
messy_excel_export	Same books as clean_firm_1, typed by hand in Excel: title lines, amounts as text, Debit/Credit columns, a Total row. No opening balances and no group tree, so LedgerCraft asks where the firm's own groups belong.	0	1,79,13,008.55

- Ground truth: every planted mistake must be found, and nothing else; clean books must raise nothing (also 60 random clean books).
- Casting: printed statements must add up in 6 units across 33 books.
- Round trip: Excel/CSV, Tally XML (mock server) and the app must give identical results.
- Browser walkthrough of every screen at 1440, 1280 and 1024 px (create client, import, check, map, adjust, disclose, present, export, audit, delete/restore, search).
- Performance: about 1 million vouchers checked in about 5 seconds (benchmark).
- **Not yet done:** real client books; real TallyPrime, Zoho, BUSY, bank, GST and 26AS files; Microsoft Word; installing on a real Windows PC.

17. Installation and distribution

- Installer LedgerCraft-Setup-<version>.exe (NSIS): per-user, no administrator rights; Start menu (LedgerCraft, User guides, Practice books, Uninstall) and desktop icon; uninstall never touches Documents\LedgerCraft Data.

- Not code-signed: Windows shows 'Unknown publisher' (More info → Run anyway). Free signing for open-source projects (SignPath Foundation) needs an open-source licence, which conflicts with 'no licence'.
- GitHub Actions builds and tests on Ubuntu and Windows and makes the installer; Actions have not run since 3 October (they may need enabling in the repository's Actions tab).
- User guides: README (English), docs/GUIDE-hi.md (Hindi), docs/GUIDE-mr.md (Marathi).

18. Sources consulted

Web searches made during the build (as typed). Results were read as search summaries; where a page itself was opened it is listed in 18.2.

- Companies Act, 2013, Schedule III (as amended 24-03-2021) and Schedule II — mca.gov.in / indiacode.nic.in
- ICAI Guidance Notes: Division I (Non Ind AS) Schedule III (Jan 2022); Non-Corporate Entities (Aug 2023) and its applicability announcement (31-03-2026); LLPs — ica-i.org
- Income-tax Act, 2025 and Income-tax Rules, 2026 (sections 33/34, 36, 63, 185, 186, 188; Rule 47; Form 26; depreciation table) — incometaxindia.gov.in, including the utility mapping 1961 sections to 2025 sections
- Companies (Accounts) Rules, 2014, rule 3(1) proviso; MSMED Act, 2006 s.22

19. Verification register (facts and their status)

Fact	Status	Source
Non-Corporate & LLP GN phased	Reported from ICAI ASB	ica-i.org/post/asb-announ-

Fact	Status	Source
applicability (Phase I 1-4-2025 >₹5 cr; Phase II 1-4-2026 all)	announcement 31-03-2026; official page blocked from our environment — please open and confirm	310326; TaxScan; CAclubindia
Non-Corporate GN issued Aug 2023; LLP has separate GN	Multiple secondary sources agree	Taxmann, ClearTax
GN on Div I (Non-Ind AS) Schedule III revised Jan 2022; Schedule III amended by MCA notification 24-03-2021	ICAI resource listing	resource.cdn.icai.org (gnd1.pdf)
Income-tax Act, 2025 in force 1-4-2026	Multiple sources	Wikipedia; TaxGuru
New-Act depreciation section number (33 vs 34)	Conflicting — verify	TaxTMI, TaxGuru
Tally XML over HTTP, default port 9000	Official Tally help	help.tallysolutions.com/xml-integration
Zoho Books API v3, OAuth, India domain `zohoapis.in`	Official Zoho docs	zoho.com/books/api/v3
BUSY has no public API; Excel/XML export	Vendor/secondary sources	busy.in FAQs
Black Horse tool features	Indexed product pages (site blocked)	IndiaMART listing, Scribd manual
CompuBal / CompuTax features	Indexed vendor pages (site blocked — verify)	computaxonline.com, computax.in, IndiaMART, SoftwareSuggest
UDIN: portal generation, key figures, bulk facility; API verification used by authorities	ICAI UDIN FAQs & portal manual	udin.icai.org
No public UDIN-generation API for third-party software	Not found in our search — treat as unavailable until ICAI states otherwise	—

Fact	Status	Source
Audit trail: Rule 3(1) proviso, FY from 1-4-2023	ICAI CA Journal + multiple sources	cajournal.icai.org
SignPath Foundation: free code signing for open-source (publisher shown as SignPath Foundation)	Multiple project references; apply & confirm eligibility	signpath.org
Cash limits ₹10,000 / ₹2 lakh / ₹20,000 unchanged under IT Act 2025	Secondary sources	ClearTax, TaxGarden
New-Act section numbers for 269SS/269T/269ST/40A(3)	Conflicting — confirm from official Act text	incorpx, taxgarden
Ollama runs locally on Windows, free	Project docs / earlier research	ollama.com
Tauri v2 updater: signed updates mandatory, static `latest.json` on GitHub Releases, NSIS/MSI	Official Tauri docs	v2.tauri.app/plugin/updater

Additional: Form 3CD clause 31 sub-clauses (a), (b), (ba), (bb), (bc), (bd), (c), (d), (e) confirmed from search results; Form 26 clause numbers not mapped; the counterpart of s.43(1) 6th proviso not confirmed.

20. Pending, unverified and known limitations

20.1 To verify against official texts

- Every line of the three format packs against Schedule III Division I and the two ICAI Guidance Notes (wording, order, sub-classification).
- Income-tax Act 2025 section numbers: s.36 (cash payments) and its sub-section; counterpart of s.43(1) 6th proviso; depreciation s.33 vs s.34; ss.185, 186, 188; s.63.
- Form 26 clause numbering and content; map the helper workbook to it.
- Depreciation tables (Schedule II lives; Income-tax block rates under the 2025 Act and Rules 2026).
- Applicability dates of the Non-Corporate Guidance Note (phases).
- Standard accounting-policy wording per entity type.
- Hindi and Marathi help text and guides (native-speaker review).

20.2 Not built

- Ind AS formats (Schedule III Division II/III); XBRL (MCA AOC-4).
- ITR schedule export; deferred tax computation (AS 22) — only the policy text exists.

- Inventory valuation (stock is taken from the books, not computed); trusts and societies.
- Monthly comparison with last year's months (last year's day book is not imported).
- Code signing; automatic updates.

20.3 Known limitations

- Not yet run on any real client's books or real exports from Tally, Zoho, BUSY, banks, GST portal or TRACES.
- Zoho API path untested against a live account; Tally tested against a mock server.
- Party matching for GSTR-2B/26AS uses names when GSTIN/TAN is not in the books; similar names need your check.
- Bank matching window is 10 days and needs equal amounts; split or combined bank entries stay as open items.
- 'Points to look at' uses fixed thresholds (25%, 15 points, 2 percentage points, 0.5% materiality); they are a starting point for questions, not conclusions.
- The installer has not been tried on a Windows PC by us; GitHub Actions are not running at present.
- A lowercase 'ledgercraft' branch still exists on GitHub and clashes with 'LedgerCraft' on Windows; please delete it.

21. Change log (every commit)

Commit	Date	Summary
555a030	2026-10-02	Add blueprint for free financial statements preparation tool
0eda2aa	2026-10-02	Blueprint: add Computax benchmark, data integrity, audit trail, UDIN, language policy
2a1d1b7	2026-10-02	Blueprint: fix differentiator table order
132d023	2026-10-02	Blueprint: restore roll-forward row in differentiator table
2fe40c3	2026-10-02	Blueprint: UDIN paste-only, export-to-folder, engineering plan, distribution
66ac067	2026-10-02	Blueprint: fix section labels
d31406a	2026-10-02	LedgerCraft: modules, large-data engine, audit assist, local AI, user modes

Commit	Date	Summary
b60c6a3	2026-10-02	Add LedgerCraft engine v0.1 with checks, statements, export and ground-truth tests
ddc6455	2026-10-03	LedgerCraft: report design system, PDF/Excel/HTML renderers, FAR, cash flow, ratios, ageing
64b910e	2026-10-03	LedgerCraft v0.2: desktop app, importers, local AI, design architecture docs
828b91c	2026-10-03	LedgerCraft app: start screen by purpose, analysis screen, manual adjustments, show/hide statements, delete/restore, help in 3 languages, parallel server
d2879e1	2026-10-03	LedgerCraft: client search bar, status bar, professional title bar; Form 26 / Income-tax Act 2025 references by year; key-figure sign fix
8672ce9	2026-10-04	LedgerCraft app: one structured design system, bundled IBM Plex Sans, aligned controls
9269fcb	2026-10-04	LedgerCraft: accounting truth model, mapping confidence, three-state disclosures, pinned rule packs
2142755	2026-10-04	LedgerCraft: roll forward to the next year
3b1a618	2026-10-04	LedgerCraft: branch consolidation
ed52bbd	2026-10-04	LedgerCraft: clippy fix in branch upload
0617646	2026-10-04	LedgerCraft: statements for any period (month, quarter, half year, calendar year)
50ca2c1	2026-10-04	LedgerCraft: Word (.docx) output of the financial statements
2858e09	2026-10-04	LedgerCraft: export test lists the Word file choice
f7f860b	2026-	LedgerCraft: tax audit helper workbook and bank reconciliation

Commit	Date	Summary
	10-04	
54b714f	2026-10-04	LedgerCraft: GSTR-2B and Form 26AS reconciliation
732642e	2026-10-04	LedgerCraft: analytical charts in the app and an optional PDF annexure
b5c8182	2026-10-04	LedgerCraft: installer, Hindi/Marathi guides, more practice books, narrow-screen layout
3dd7663	2026-10-06	LedgerCraft: bento dashboard with entrance motion; cleaner screens
1640ac2	2026-10-06	LedgerCraft: last-year comparison across the dashboard and Map ledgers

Appendix A: Truth model (full text)

LedgerCraft - Accounting Truth Model

LedgerCraft is a **financial-statement compiler**: accounting data and disclosure data go in; deterministic, traceable statements come out. This document fixes what the program may decide by itself, what needs source evidence, what needs professional judgement, and what blocks a final copy. The code follows this document; where they differ, the code is wrong.

1. Two kinds of input

```
| Accounting data (from the books) | Disclosure data (from the entity / the CA) |
|---|---|
| Trial balance, ledgers and groups | Share capital particulars, shareholders, promoters |
| Vouchers (day book) | Contingent liabilities and commitments |
| Last year's trial balance | Related parties and their transactions |
| Fixed asset register | MSME status of suppliers and interest under the MSMED Act |
| | Accounting policy wording, other notes |
| | Manual adjustments (journal entries passed by the CA) |
```

Disclosure data can never be inferred from a trial balance. Its absence is never treated as "nil".

2. Three states for every disclosure

```
| State | Meaning | Printed as |
|---|---|---|
```

****Not answered**** (default)	Nobody has said anything yet	Draft: a visible "Information not yet provided" line. Final: ****blocked****
****Explicitly nil****	The user confirmed there is nothing to disclose	A nil statement ("There are no contingent liabilities...")
****Entered****	Particulars given	The particulars

Required sections: share capital (companies), contingent liabilities and commitments, related parties, MSME dues (all entities).

3. What LedgerCraft decides by itself (deterministic)

- * Arithmetic: trial-balance totals, opening = last year's closing, voucher totals = ledger movement, statements balance, rounding that casts exactly.
- * Placement of a ledger whose standard group has ****one**** possible line in the format (status ****Rule****): Capital, Reserves, Sundry Debtors, Sundry Creditors, Cash, Bank, Bank OD, Duties and Taxes, Stock-in-hand, Sales, Purchases, Indirect Incomes, Direct and Indirect Expenses, Profit & Loss A/c.
- * Cash-limit and cash-loan tests (they test facts in the vouchers; whether a penalty or disallowance finally applies is the CA's judgement, so they are reported as "Check", never decided).
- * Cash flow statement (indirect method) from two balance sheets and the P&L.
- * Depreciation from the fixed asset register using the chosen basis.

4. What needs confirmation (status ****Suggested****)

LedgerCraft proposes; the user confirms. Until confirmed, a final copy is locked.

- * A group with more than one possible line: loans (long-term vs short-term), loans and advances and deposits (non-current vs current), investments, provisions, fixed assets (PPE / intangibles / work in progress), current liabilities, current assets, direct incomes, suspense, branch accounts.
- * Placement found from the ledger ****name**** (salary, interest, depreciation, partners' remuneration ...).
- * A ledger moved to the other side because of its balance (debtor in credit, creditor in debit, bank overdrawn).
- * Any AI suggestion.

5. When a remembered choice is re-opened (status ****Review****)

A choice the user made for a client is reused every year, but it is re-opened when the context changed:

- * the ledger's group in the books is different from when it was confirmed;
- * the balance changed side (Dr ↔ Cr).

6. What is always professional judgement (never automated)

- * Whether a disclosure is required beyond the format's standard lines.
- * Classification as current / non-current where the books do not say.
- * Whether a cash payment falls in an exception (Rule 6DD and similar).
- * Whether an unresolved difference is acceptable.

* Accounting policy wording and the audit opinion.

The local AI may explain and suggest in these areas; it never decides, never changes a figure and never confirms a mapping. Every AI answer is labelled and recorded.

7. What blocks a final (signing) copy

Draft copies are always allowed and say on the first page how many problems are unresolved. A final copy is refused while any of these is true:

1. A "Must fix" finding is open (trial balance does not tally, unknown group, unmapped ledger, statements do not balance, ...).
2. A ledger's placement is ****Suggested**** or ****Review**** and not confirmed.
3. A required disclosure is ****Not answered****.
4. Share capital entered does not agree with the books (companies).
5. Branch books are combined and the inter-branch accounts do not cancel out. (When they do cancel, they are shown as one nil ledger, *Inter-branch accounts (eliminated)*, so every voucher still balances and ties to the books.)

8. Rules and formats are versioned and pinned

- * Each rule carries: its id, the law or standard it comes from (authority, document, section), effective-from and effective-until dates, the entity types it applies to, and a verification status (`verified` against the official text, or `unverified`).
- * Each client year is ****pinned**** to the rule pack and format pack it started with. A newer pack is never applied silently: LedgerCraft shows what changed and the user chooses to move the year to it. The move is recorded in the audit trail. Earlier exports can therefore always be reproduced.
- * Every export records the pack versions it used.

9. Audit trail

The audit trail is ****tamper-evident****, not tamper-proof: every event is sealed with the fingerprint of the one before, so editing or removing an event in the middle is detected. Someone with full control of the files could still delete the whole history; export the trail with the statements to keep an outside copy.

10. Status of the legal content

Format packs and several legal references are marked `unverified` until each line is compared with the official text (see DESIGN.md §7). Verification is recorded in the pack, not in this document.

Appendix B: Your messages (verbatim)

Long tool instructions and screenshots are left out.

1. Search for the best GitHub Repository which helps even non developers and normal' lamen users ... Which help this

- in daily work or fun
2. Think out of the box and help me develop a concept of what potentially we can build in terms of Finance + tech + normal day work or any other thing as well
 3. I want to build a software that can literally help Entities prepare Financial statements in Format Prescribed by ICAI AND LAW as per Guidance note which updates itself from time to time.. Give simple explanation of why this is required Right from Import Tally Data with a single click.If button.import from zoho books Import from busy Import excel trial balance in particular format Shift Current Year to right side (to make Next year financials so current year becomes previous year) Shows error Ledger making most simple and fast possible... Search for Black horse excellencd
<https://blackhorseexcellence.com/> their.youtubr and all I want a make a product free for all Self responsible.. compatible of managing Financials Depreciation calculation inventory and All step by step Toggle switches etc.. Even to that extent that Print options... What to display when to Notes to Accounts Design Format of Boxes and all for presentation of Financials... All for Free Firstly you need to gather a lot of knowledge as to how to do it Which all external Connections will be required Also we need in such detail that Companies , individual, huf ,app ,boi , Partnership firm , LLP Dep as per income tax master selector...fixed asset register All shall be such simple so that no one feels mechanical and can be donr with making in under 3-4 mins after all imports and all Thinking and planning later they can do using CA'S profesonal Brain
 4. My intent is to solve the problem not to sell anything Also.make.sure you go through Compu Tax and Compu bal things the features they offer Toughest coding which prevents data error Self Correction, trouble shoot things and most importantly Data saving and Audit / Software Trails Not all time we should keep on. Mapping and all Right from.UDIN source etc.. I want such that financials.even language shall be such which is acceptable in law and simple for.normal.user to understand Compatible with New Income tax act , companies act ICAI guidance notes and what not which is genuine and as per Law and Order Not much of design and all when final export comes because Progressism does not entertain that
 5. We don't want to integrate udin as of now But giving space to paste and then direct print ready for signing et.c... Scanner balance sheet , p&l and whatever statment we select shall immediately be available in folder PDF/Excel form etc Think without errors in coding how will you achieve this level of big thing How will user use this tool ? GitHub to download app for Online or what ?m
 6. Yes Windows desktop No licence Name of The product is (Ledger craft
 7. Train on huge amount of data Even biggest of biggest data with thousands of jorunal vouchers and all to be checked Also Complaiace of Cash Transaction potential Disallowence ...earlier sect 269ss St 269t tax audit checks in extra sheet to be given to auditor for his reference Basically this LedgerCraft shall be Able to Do so much in offline without AI that it is super Human in itself If required free open source Ai modules can also be installed ? For doing work like ollama and all ?? Do whatever u want I am not a technical person It just told you my intention is to make Financial Reporting more seamless and time efficient and whatever is required to be reported by auditor It shall help Auditor CA's in India in all aspects When preparing one work .. an auditor' or consultant need to make sure of all applicable laws isn't it But All modules should be different Balance Sheet (financial statement builder to be different) analysis part diff reporting diff Etc.... all inter linked but can also be used seperately that all Basically you make it full flexible Automate it to the extent possible All in simple most language explaind No reputation No Unnecessary data Like it should be based on guidance note but a normal lamen and all is not required to know where it is given and where it is not So Viewer/ user of tool if he is CA or Expert then ,.....and For normal person just preparing Balance sheet etc... that's different I want to make sure you in
 8. You only search for data and train yourself Like there are small small things like Opening balance differenncd. Interpretation of Legal thing like LOns taken and accepted during the year..(only principal part is considered etc) wrong grouping of loan to creditot.and all Basically I want an intelligent tool Right from basic to complex data prepare by yourself and Find glitches work on it and create a software basically
 9. Literally Everything is available on internet and I need a proper Design Structure for final output.. the Tables boxes and all of financial statements shall be proper Exclusively focus on Design Architecture Also Whatever is pending just do it Install fully functional ollama also which is connected with the tool
 10. Summarise for non technical Person what can it do now and what needs upgrade or fix
 11. Tell me something that you can do more before we check on using real data What other connectors required to fetch data and how is this better than blackhorse excellence Did you study their full YouTube video ?
 12. Do all that at the end we will test using real data feature by feature but first you complete your build
 13. Keep buttons and features at proper place and size so that all relevant things comes on one side Give optional buttons also ... Hidden Cashflow, make , delete this etc etc etc

14. Manual adjustments shall also be permitted... It's important
15. <https://accountingtool.in/product/schedule-iii-balance-sheet-software/> Wherever we are lagging in whatever sense see improve Design u.i structure feature... Lag .. slow app working buttons not working and all fix that I am gonna test each Nd everything First screen shall ask user What is the intent 1. Make Financial Statements 2. Analysis 3..... Whatever we are building this tool all those...etc..
16. How does it look share images for a glimpse
17. Install custom Design and Fonts skills proper Alignment of buttons and Screen things at all places ... Se will work on other things also But make sure all things are structured properly
18. claude/relaxed-mccarthy-5ksg1z Change its name
19. Could not change default branch
20. Done it's LedgerCraft
21. Just tell me where we are lagging ?
22. Do all of it Testing we will do all at once in end
23. Worked for 16s Yes — the idea is valid and worth continuing, but I would narrow the promise before building more features. What is correct The strongest part of LedgerCraft is the architecture: Books → normalized accounting data → deterministic validation/mapping → financial-statement model → PDF/Excel/HTML That is exactly how I would structure this kind of application. In particular, these decisions are good: lc-core owns accounting logic and does not depend on presentation. PDF/Excel/HTML are renderers, rather than separate calculation engines. Money uses deterministic calculations rather than floating-point approximations. You reconcile the output back to the TB. Mapping has provenance (Memory, NameRule, GroupDefault). Critical errors can make the engagement non-printable. AI is optional and advisory rather than being allowed to alter figures. Format/rule packs are separated from much of the program logic. Current year + previous year are modeled together. Test-data generation with intentionally planted mistakes is an excellent approach. The central product idea is therefore: > LedgerCraft should be a financial-statement compiler, not an AI accounting program. Input accounting data goes in; deterministic, traceable statements come out. One thing I would change immediately Your blueprint says: > "Auto-mapping target 90%+" Don't optimize for that metric. A system that automatically maps 98% but silently puts one ₹2 crore ledger under the wrong Sch
24. Share screenshots of how the tool looks
25. How to install
26. Add Bento dashboard animation to application Remove uncessaary and make Software Clean and Amazing
27. Need comparison from py also n that's more important anywhere to make decisions
